CIRCLE THE CORRECT ANSWER--

1. Remove delicate fossil specimens using a--

- Large heavy shovel
- Mallet and chisel
- Bulldozer
- A toothpick

2. _____ is used to separate smaller fossils from sands and gravels

- A sorter
- Masking tape
- A sieve
- A funnel

3. Use _____ to wash away smaller particles of the matrix surrounding the fossil

- Air
- Water
- Power washer
- Sponge

4. Larger fossils should be _____ in order to move.

- Wedged loose by a crow bar
- Broken into smaller pieces
- Drawn on paper
- Cast in plaster

5. If you find a valuable fossil, do not try to remove it yourself. Contact a

_____.

- Police officer
- Sabbath school teacher
- Dejan Stojkovic
- A professional

PUT THESE WORDS IN THE CORRECT BLANK SPACES BELOW:

WHEN, MILLIONS, QUICKLY, RECENTLY

Evolutionists and creationists both agree that fossils are formed when a creature is _____ buried in sediment. The big difference is that they disagree on _____ this happened. Evolutionists believe most fossils were made _____ of years ago. Creationists believe that nearly all fossils were made _____ during Noah's flood.
