wikiHow to do anything...

## Method 1 Sharpening Your Scissors With Sandpaper

**1** Obtain a piece of sandpaper. A sandpaper sheet with 150-200 grit will work just fine, but you could even go for a little bit of a finer grit (bigger grit number) if you want smoother edges to your scissor blades. Fold the sandpaper in half, with the rough sides facing outward.

- Have the rough edges face outward, so the sandpaper grazes against both blades as you cut the paper.
